

GLOBAL REFINISH
SYSTEM

Product Information

Global Cleaners

Product Description

PPG Global Cleaners are specifically designed to remove waxes, grease, silicones, road tar, engine oil, overspray, adhesives and other contaminants. They can be used on bare metal, primers or automotive finishes. Global Cleaners are packaged ready-to-use.

D837 Spirit Wipe: Suitable for removing dirt, grease or other contaminants before or during the painting process.

D846 Degreasing and Anti-Static Agent for Plastics: A fast, effective degreaser specially formulated to avoid adverse effects on plastic substrates. Reduces static electricity on all treated surfaces, minimizing the attraction of dust and dirt.

Directions for Use:

D837 and D846 as a Spirit Wipe or Degreasing agent

- Wash surface with soap and water before cleaning.
- Clean surface before and after sanding.
- Do not use D837 on plastic or fiberglass parts. Application on these surfaces can generate static build-up, which can result in flash fire.
- Apply a generous amount of D837 or D846 to a clean white cloth or with a hand held spray bottle.
- Initial application floats contaminants to the surface where the second wipe with a clean dry cloth will remove the contaminants.
- For maximum results, wipe dry with clean white cloth in one direction only, while the surface is still wet to eliminate smearing of contaminants.
- Do not apply D846 over fresh topcoats or primers, or other sensitive substrates, as softening may occur.

D846 as a Anti-Static Agent

- Using a spray gun, apply a mist coat of D846 on the surface to be painted both before and after tacking. This will help reduce static electricity on all treated surfaces, minimizing the attraction of dust and dirt. Coverage is about one quart per car.

Caution: Wear solvent resistant gloves and safety glasses while using surface cleaning products.

Note: Local air quality regulations may limit use of specific Global cleaners. Verify acceptability before use.

TECHNICAL DATA

	D837	D846
VOC	6.36 lbs/gal	6.49 lbs/gal
Flashpoint (PMCC)	60°F / 16°C	53°F / 12°C

Health and Safety:

See Material Safety Data Sheet and Labels for additional safety information and handling instructions.

- The contents of this package may have to be blended with other components before the product can be used. Before opening the packages, be sure you understand the warning messages on the labels and MSDS's of all the components, since the mixture will have the hazards of all its parts.
- Improper handling and use, for example, poor spray technique, inadequate engineering controls and/or lack of proper Personal Protective Equipment (PPE), may result in hazardous conditions or injury.
- Follow spray equipment manufacturer's instructions to prevent personal injury or fire.
- Provide adequate ventilation for health and fire hazard control.
- Follow company policy, product MSDS and respirator manufacturer's recommendations for selection and proper use of respiratory protection. Be sure employees are adequately trained on the safe use of respirators per company and regulatory requirements.
- Wear appropriate PPE such as eye and skin protection. In the event of injury, see first aid procedures on MSDS.
- Always observe all applicable precautions and follow good safety and hygiene practices.

Emergency Medical or Spill Control Information (412) 434-4515; In Canada (514) 645-1320

Materials described are designed for application by professional, trained personnel using proper equipment and are not intended for sale to the general public. Products mentioned may be hazardous and should only be used according to directions, while observing precautions and warning statements listed on label. Statements and methods described are based upon the best information and practices known to PPG Industries. Procedures for applications mentioned are suggestions only and are not to be construed as representations or warranties as to performance, results, or fitness for any intended use, nor does PPG Industries warrant freedom from patent infringement in the use of any formula or process set forth herein.
